SUMMARY

Fullstack Developer and AI Engineer with hands-on experience building multi-agent systems, business automations, and full-cycle product development. Proficient in Python, TypeScript, and AI frameworks (LangChain, LangGraph). Experienced in deploying AI-powered products and integrating LLMs into real-world applications.

WORK EXPERIENCE

Fullstack Developer & AI Engineer

Apr 2025 — Present

NooLogic · noologic.ai

- Built AI-powered products end-to-end: multi-agent systems using LangChain and LangGraph.
- Developed domain-specific AI solutions — sales agents, medical clinic consultants, AI tour guides — with CRM, payment, and delivery integrations.
- Fullstack: Python/TypeScript backends, React frontends, Docker, PostgreSQL, CI/CD pipelines.

AI Automation Specialist

Jul 2024 — Mar 2025

2GET Agency

- Designed and deployed business automations using Make, Zapier, and n8n.
- Automated routine tasks and implemented AI-driven workflows for clients.

Software Engineer

2022 — 2023

CSystems (R-Keeper), Kyiv

- Administered and configured R-Keeper POS software across client stations.
- Provided technical support, system maintenance, and computer administration.

PROJECTS

Autonomous AI Agent — Self-developing agent (OpenClaw). \$200 revenue in first month.

Isnad — isnad.site — AI agent trust & screening platform.

EDUCATION

Bachelor's Degree

Sep 2019 — Jul 2023

National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute"

Faculty of Electronics — Acoustic Multimedia Electronic Systems

TECHNICAL SKILLS

AI & ML: LangChain, LangGraph, multi-agent systems, Claude API, GPT, Gemini

Backend: Python, TypeScript, Node.js, NestJS, Django, RESTful APIs, microservices

Frontend: React, Next.js, HTML/CSS, JavaScript

DevOps & DB: Docker, CI/CD, PostgreSQL, Supabase, Pinecone, VPS deployment

Automation: Make (Integromat), Zapier, n8n

COURSES

JavaScript — Mate Academy

2022

Python — Online course

2024

LANGUAGES

Ukrainian — Native | English — B2 (Upper-Intermediate)
