Professional Profile

Moqit Hossen Alghozi is a visionary blockchain architect and the founder of **ZOFIA (Zooqofficial)**, a next-generation DeFi token deployed across **Ethereum, Polygon, and Avalanche**. With deep expertise in smart contract engineering, tokenomics, and cross-chain interoperability, he has led the end-to-end development of a fully verified ERC-20 ecosystem. His work combines technical excellence with strategic community building, resulting in a global footprint of over 10,000 active members and successful capital raises.

Core Competencies

Solidity

Ethereum

Polygon

Avalanche

DeFi Protocols

Smart Contracts

Foundry

Hardhat

Tokenomics

Cross-Chain Bridges

DAO Governance

ERC-20

Web3 Architecture

Vercel & DevOps

Community Growth

Multi-Chain Deployments

Ethereum Mainnet **ERC-20**

Professional Experience

Founder & Lead Blockchain Architect

ZOFIA (Zooqofficial) - Multi-Chain DeFi Ecosystem

2026 - Present

- Architected and deployed a fully verified ERC-20 token across **Ethereum, Polygon, and Avalanche**, managing a total supply of **100 trillion ZOFIA**.
- Led the engineering of core DeFi features including **staking rewards, on-chain governance**, and a **deflationary burn mechanism** (2% per transaction).
- Designed and implemented a **secure cross-chain bridge** enabling seamless asset transfers between the three major EVM-compatible networks.
- Secured **\$1.5M+ in liquidity** with a **3-year lock** and successfully coordinated a comprehensive security audit with **CertiK**.
- Built the project's digital presence from scratch, including a professional website and detailed whitepaper, using HTML, CSS, and Vercel.
- Scaled the global community to **10,000+ active members** across Telegram, X (Twitter), and Discord.

- Executed a successful presale on **Fjord Foundry**, raising significant initial capital to fuel product development and marketing.

Blockchain Developer & Technical Consultant

Freelance / Independent

2024 - 2026

- Developed and deployed production-grade smart contracts for multiple DeFi projects on Ethereum and Polygon.
- Provided strategic technical consultancy on **tokenomics optimization**, smart contract security, and go-to-market strategies for emerging Web3 startups.
- Engineered automation tools for community management and token distribution using **Python** and Web3 libraries.
- Collaborated with cross-functional teams to successfully launch NFT collections and decentralized autonomous organizations (DAOs).

Education

Bachelor of Computer Science

Self-Taught / Web3 Ecosystem (Continuous Learning)

Graduated: 2026

- Focused on distributed systems, advanced cryptography, and decentralized application architecture.
- Capstone Project: Developed a multi-chain DeFi protocol with dynamic smart contract optimization.

Languages

- **Arabic:** Native
- **English:** Professional Proficiency (Business & Technical)

Professional Interests

- **Decentralized Finance (DeFi):** Layer-2 scaling solutions and innovative yield mechanisms.
- **DAO Governance:** Building autonomous, community-led protocols with transparent decision-making.
- **Interoperability:** Advancing cross-chain bridges and multi-chain ecosystem integration.
- **Open-Source Education:** Mentoring and contributing to Web3 developer resources and communities.
